

Centro WebNet Broadband Services

Centro Webnet are a provider of Broadband Business service, which gives you **high speed** access to the internet **up to 40 times faster** than your regular dial-up connection, and up to 20:1 contention ratio. It's an '**always on**' connection and you also get a **STATIC IP ADDRESS**, which is very important for businesses, plus your telephone line won't be tied up anymore as you can **still make calls**, even when you're surfing the net. You could be up and running in around 7-10 days from the date of your order. In addition to Broadband Services, Centro Webnet can also offer Email and Website Hosting, Email virus scanning. We can also provide secure Firewall and VPN access to your network. Detailed below are our standard packages, which are only geared to business users and can be tailored to your requirements.

ENHANCED SMTP GOLD EMAIL SERVICE

- 1) Your own dedicated SMTP RELAY HOST server on our Public network
- 2) Customizable spam filtering
- 3) Black lists and white lists for domains
- 4) SMTP virus scanning inbound and outbound if you require
- 5) BACKUP smtp server in case of failure
- 6) 4 hour response to email issues.
- 7) Web based access to the relay host to view mail waiting to be downloaded to your server.

Also because it is your own relay host there is only your mail going through the server. The service costs **£40.00 per Month** that can be paid quarterly in advance. This service is designed for customers that have their own mail server, and Email is a really important part of the business where they need, and enhanced level of service above and beyond the standard

- Broadband utilises ADSL technology, is subject to availability and survey. Installation/activation charges apply. Requires a BT line normally £99.00 installtion. 3 months minimum contract period applies from date of activation.
